Assignment Review Form
COMPSYS723-Assignment 2

This form must be completed to evaluate the overall performance of the assignment. Fill **one form for each group**.

Fill in the following information:

Team/Group Number : 23

Name of the Student 1: David Su

Name of the Student 2: Maryam Zehra

Name of the Student 3: Matthew Taylor

Please fill in the following table to indicate the number of hours spent by each student.

Task	Student 1	Student 2	Student 3
Planning	4	3	1
Understanding the assignment	3	6	1
Understanding Esterel	4	5	2
Programming	2	3	5
Debugging	2	1	4
Documentation and Reporting	2	1.5	2
Validation and Testing	1	1	2
Total number of hours	18	20.5	17

Any further comments on the assignment:
Esterel is straightforward and easy to use, as well as particularly useful when designing critical systems. Only difficulties would be the specific software required (Ubuntu) to be able to compile a program, as this may not be accessible for every user.

The formal verification vectors provided were very limited. Of the 20 provided lines, only two tested the system while the state was not off. While this allowed us to think more about the assignment specifications, if the requirements were more complex the lack of test cases would make it more difficult to understand.
